AMAC Action Statement of Support for H.R. 4093, the Apples-to-Apples Comparison Act

AMAC Action supports HR 4093, the Apples-to-Apples Comparison Act which ensures that comparisons between Medicare Advantage and traditional Fee-for-Service Medicare are accurate, transparent, and based on meaningful data. Medicare beneficiaries deserve clear and reliable information when policymakers evaluate different approaches to delivering health care. Comparisons should account for important differences in benefit design, patient health status and risk, and clinical quality so that policymakers and the public have a fair understanding of how each program performs. AMAC Action supports continued efforts to improve the transparency, accuracy, and integrity of Medicare program evaluations.
